

Accelerating European Cleantech Innovation

Carina Bitšikov, Project Coordinator, FinEst Centre for Smart Cities

FINEX project partners & Countries

- EIT Digital (BE & Europe)
- HEC Paris and Cleantech Group France (FR)
- KIOS Center of Excellence for Research & Innovation, University of Cyprus (CY)
- Sunrise Valley Science & Technology Park (LT)
- Riga Technical University (LV)
- The Big Data for Smart Society Institute (GATE), Sofia University St. Kliment Ohridski (BG)
- Aalto University (FI)
- FinEst Centre for Smart Cities, TalTech (EE)

Cleantech Piloting Barriers

The Challenge for Cleantech and Deep Tech

Barriers:

- Fragmented access to testbeds & partners
- Unclear or inconsistent regulations
- Public buyers are interested but overloaded

FINEX reduces friction and enables cross-border pilots

- Find suitable experimentation spaces
- Test solutions in real-life or regulatory environments.
- Sharing knowledge and best practices to experimentation spaces

FINEX: A European Piloting Infrastructure

- Each region offers a unique mix of testbeds, public stakeholders, policy expertise, and startup ecosystems. Together, we form a **network of experimentation environments**.
- Our focus is on four areas for the green and digital transition:
 - Clean energy systems
 - Sustainable mobility
 - Built environment
 - Digital public infrastructure and governance
- Currently working with 6 pilot projects, identifying:
 - Practical bottlenecks,
 - Regulatory and policy challenges
 - Gaps in current experimentation reameworks

FINEX HelpDesk & Service Catalogue

Access: FINEX Ecosystem
Experimentation Spaces Resource
Catalogue or via FINEX Helpdesk
